

Exceptional Safety. Complete Control.

NexStar[™]
CRANE MANAGEMENT SYSTEM

Auto Crane's innovative NexStar[™] crane control technology delivers the ultimate in crane safety in two important ways:

- The patented NexStar system **eliminates unsafe overload conditions** even in the harshest or most unpredictable environments.
- NexStar puts unprecedented precision control right in the operator's hand, **enabling multiple crane functions simultaneously and proportionally.**

Auto Crane[®] launched the service-crane industry 55 years ago. Today, we push the industry forward through safety-focused innovation and our entrepreneurial drive to solve the challenges faced by our customers.

Auto Crane. **Trust the brand that started it all.**

- Identifies the angle of the truck and the boom, preventing unsafe operation in unstable situations
- Fully independent proportional control with multiple speed settings enables precise placement of load
- LCD display, status lights and audible alarm communicate critical information and diagnostics
