

### Transform your truck into a connected system.

- **Integrated Communication:** Links engine, transmission, and NexStar crane via J1939 CAN.
- **Smart Power Module:** Connects with a keypad and power distribution module.
- **Expandable:** Supports additional accessories like compressors and power units.
- **Enhanced Telematics:** Feeds information to existing truck telematics systems.

### CONNECTIVITY THROUGH INNOVATION

- **Faster, Consistent Installation:** Ensures quick and uniform setup.
- **Universal Troubleshooting:** Simplifies diagnostics regardless of truck builder.
- **Comprehensive Kit:** Includes 4 harnesses, keypad, PDM, E-Stop, brackets, and hardware.
- **Plug and Play Connections:** Simplifies and speeds up installation.
- **Nylon Braided Loom:** Enhanced abrasion protection.
- **Pre-wired Circuits:** Includes connectors for standard equipment like cranes, work lights, strobe lights, compressors, and PTO.

An automatic system that manages your truck engine and PTO, boosting productivity while reducing fuel and maintenance costs.

- Maximizes Fuel Savings
- Reduces Carbon Emissions
- Extends Engine and Chassis Life

## KEY BENEFITS

- Automated Optimization: Enhances truck engine and PTO power, extending chassis and power source lifespan.
- Automated Safety: Integrates safety behaviors to reduce risks.
- Cost Efficiency: Lowers both acquisition and operating costs.
- Boost Productivity: Streamlines tasks at the press of a button.
- Fleet Management: Allows managers to monitor and manage engine and chassis usage effectively.
